# DESIGN

**Brunel University London's on-campus pathway provider provides a foundation degree in Design for students who may not qualify for direct entry to a degree programme and seek a supportive learning environment.**

## Study Design at Brunel

Throughout your design degree at Brunel you will be supported to enhance both your creative and technical ability in order to develop your ideas for new products and services from concept to completion. You will be immersed into a tight-knit community all striving towards the same goal – to identify fantastic design ideas for the real world.

Our close relationship with many industry experts in and around London means that you have the chance to be noticed and to build your network of contacts at multiple points throughout your time with us.

Our dedicated studios and workshops are collaborative spaces where the community of design students at Brunel University London all share advice, support and creative ideas.

To help you prepare for the world of work, we'll encourage you to take the placement option, incorporating a year spent in industry. This means you'll have a year's worth of invaluable professional experience and networks when you graduate. Our students have worked on placement for both small innovation start-ups and multinational organisations.

Our design graduates are highly valued in the industry, working around the world for organisations where excellence in design is crucial to the brand, including Apple, Audi, British Airways, Dyson, Habitat International, Lego, Microsoft, Philips, Procter & Gamble, and Virgin Atlantic.

## Made in Brunel

Each year our students run a series of industry and community events leading up to the Made in Brunel exhibition. This annual showcase is a highlight of the London design calendar and promotes the incredible work our students produce to the creative community, and is a great way for you to network with key design professionals.

## Key facts

### Undergraduate pathway in Design

#### Duration

Two semesters

#### Intakes

September, January

#### Course fee

International: £16,350

EU: £9,250

#### Typical modules

2D Design

3D Design

Interactive Learning Skills and Communication

Practical Research Skills

Problem Solving, Creative Thinking & Analytical Skills

Specialist Design Project
